

Data Aggregation

Factual Data for Informed Decisions

Empower your decision-making with accurate, timely data.

At Claritas Rx, we go beyond delivering data—we provide confidence. Our data aggregation solution delivers de-identified, longitudinally matched, and up-to-date data, equipping your team with real-time actionable insights. Enhance data quality, set dependable KPIs, and make informed business decisions with data you can trust.

Data Management, Simplified

At Claritas Rx, we don't just process the data, we digest it and deliver meaningful insights to you and your team. This lets you focus on growth and patient support rather than data issues.

Large-Scale Daily Source Ingestion

The Claritas Rx specialty pharmaceutical data aggregation platform simplifies the complex process of gathering, validating, and organizing data from diverse sources. These include Specialty Pharma, Patient Services Hubs, Co-pay providers, and data warehouse aggregators, ensuring seamless and efficient data management.

Accurate Patient Matching and De-Identification

Our proprietary, compliant PHI and token matching method integrates data from all sources, allowing you to maintain a complete longitudinal record and gain a comprehensive view of the patient journey. With flexible token engines, our solution ensures seamless data integration, even when PHI is unavailable.

Protect Patient Privacy and Meet Industry Standards

Claritas Rx adheres to rigorous industry standards to ensure secure and reliable data handling, minimizing risks and safeguarding your organization. With compliance to HIPAA, HITECH, GDPR, and SOC2, you gain access to clean, trustworthy data to drive informed decisions with confidence.

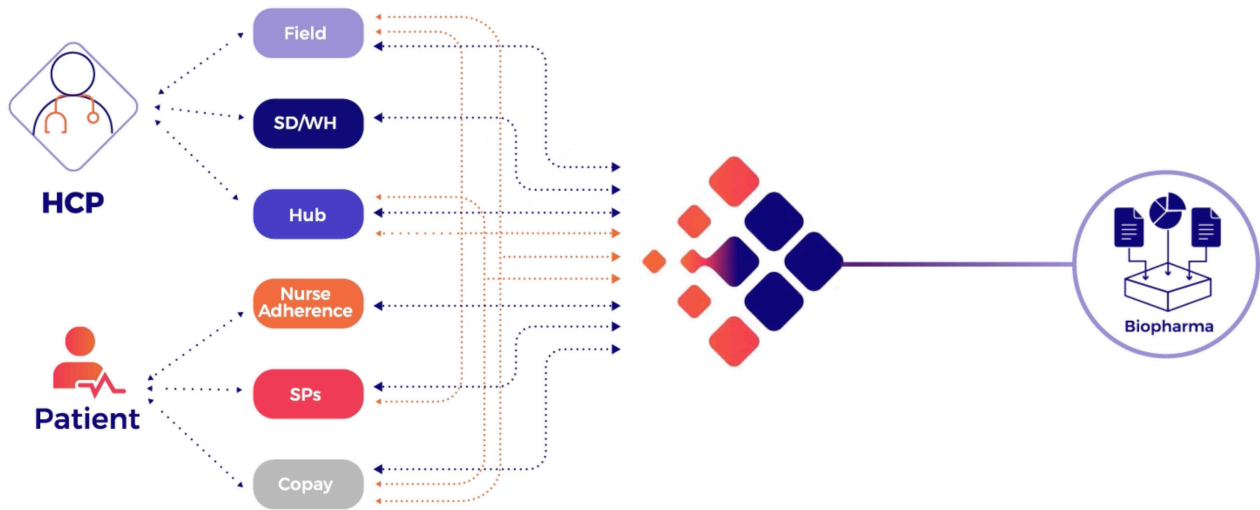

Experience Seamless Implementation

The Claritas Rx implementation team uses a phased plan to ensure a smooth go-live and positive ongoing experience. Our team has industry and data experience to effectively manage the process and mitigate risks to meet your timelines and expectations.

Achieve Unmatched Data Quality

Focus on creating transformative market access strategies with data you can trust. The Claritas Rx Data Aggregation solution leverages advanced measures to ensure your data is clean, accurate, and reliable. Here's how:

- Rigorous validation checks to guarantee completeness and accuracy
- An automated rules engine to detect and flag discrepancies in incoming data
- Daily transaction reconciliation to fill gaps, ensure completeness, and maintain confidence in data consistency
- Automatic monitoring of data quality status
- Streamlined daily reconciliation processes for efficiency.

In just one year, we've enhanced data quality by **66%** for clients who switched to our platform.

Discover the Power of the Claritas Rx Ascend™ Platform Through the Words of Our Satisfied Customers

“

Through the Claritas Rx Data Aggregation services, we receive operationally excellent, accurate, and timely patient data that ensures effective assistance for patients in therapy. This data boosts our ability to enhance patient results throughout the course of the therapy experience.”
